

KIP DURNEY

GEORGETOWN, MA 01833

978 701 1611 | durney@pm.me | [Kip Durney | LinkedIn](#) ([linkedin.com/in/durney](https://www.linkedin.com/in/durney))

As a seasoned professional with over 20 years of experience spanning business, technology, healthcare, and communications, I have a proven track record in managing complex programs, technology implementations, and product development initiatives across various industries, including healthcare, medical devices, IT, and financial services. My expertise lies in bridging the gap between business and IT, optimizing processes, and fostering strategic relationships with global stakeholders to ensure successful project outcomes. I have successfully led initiatives in program and project management, product evaluations, change management, and organizational design, demonstrating a deep understanding of both technical and business needs.

My recent experience has focused on leading large-scale cybersecurity initiatives and IT solution implementations in the healthcare and consulting sectors. At Point32Health, I managed information protection programs, including sensitive data discovery, classification, and operationalizing Microsoft Purview to secure both cloud and on-premises assets. At Boston Consulting Group, I led global projects to implement next-generation firewall solutions and helped establish a newly formed Security Operations Center (SOC), working with cross-functional teams across the U.S., Europe, and Asia. I've worked extensively with tools such as M365, Smartsheet, Jira, and PeopleSoft, and I'm fluent in both Agile and Waterfall delivery models. My ability to lead complex, high-visibility programs and collaborate with global stakeholders has consistently driven successful business and technology outcomes.

Core Competencies:

- Business & IT Management
- SDLC Project Management
- Organizational Development
- Technology Evaluations and Implementation
- Project/ Portfolio Management
- Cybersecurity and Information Security
- Security Operations

- Miro
- MS Purview

WORK EXPERIENCE

SEI Consulting, Boston, MA

09/2017 – 07/2025

Principal Consultant (09/2019 – 07/2025)

Led strategic technology and business transformation initiatives across healthcare, financial services, and cybersecurity sectors. Specialized in enterprise IT strategy, program and change management, and solution delivery. Partnered with C-suite stakeholders to drive organizational effectiveness and digital innovation.

- Built and maintained trusted relationships with cross-functional stakeholders, understanding client demands and implementing business-driven solutions; collaborated with executive sponsors to define project scope and translate strategies into actionable business objectives and program goals.
- Guided client initiatives by leading project teams, conducting analysis, managing risks, monitoring progress, and implementing new processes, technologies, and strategies with business owners.
- Influenced, negotiated, and built consensus across highly political organizations to drive change within business units.
- Advocate leadership role to mentor & coach other consultants; provide feedback for over 100 performance evaluations.

Sr. Consultant (09/2018 – 08/2019)

Staff Consultant (09/2017 – 08/2018)

SEI Client Project Work

Cybersecurity Project Lead, Point32Health | Randolph, MA

Project lead for multiple cybersecurity initiatives within the client's Cyber and Information Security team. Efforts focused on advancing Information Protection initiatives including sensitive data discovery and tagging as well as the operationalization of tools like Microsoft Purview to protect both cloud and on-premises data assets.

Security Operations Project & Program Manager, Boston Consulting Group (BCG) | Boston, MA

- Managed global implementation of a Next Generation Firewall (NGFW) solution (Palo Alto) for all on-premises global data centers (US, Asia, and Europe) as well as all NGFWs running on AWS; developed roadmap for implementation of Wildfire intrusion protection features.
- Served as part of the Project/Program Management leadership team that led the development and implementation of a newly formed cybersecurity operations center (SOC) using tools like MS Project, Trello, Team Gantt, and Slack, Jira, and Confluence to ensure deadlines and milestones were met with a geographically disperse project team that spanned the globe.
- Managed the system transition process (people, processes, and technologies), all backfill resource management (sourcing, interviewing, hiring), detailed documentation, legacy knowledge base (KB) articles and project artifacts, and vendor-developed technical documentation.
- Subsequent projects included the evaluation & implementation of many security tools and technologies such as Palo Alto firewalls, Proofpoint's Wombat (phishing), Symantec Endpoint Protection (SEP), FireEye (next generation endpoint detection and response (EDR)), etc.

Chief of Staff, Ethicon (Johnson & Johnson) | Cincinnati, OH

Leveraging the McKinsey 7S Framework, analyzed and developed current and future state organizational conceptual models respectively to align with re-defined enterprise leadership strategy. Included detailed stakeholder interviews and analysis to align medical device product teams to newly curated organizational approach to TTM initiatives.

Sr. Project Manager, Mercer | New York, NY

Support clients through the end-to-end divestiture lifecycle, including strategic planning, carve-out execution, and post-separation optimization. Provide financial, operational, and organizational analysis to drive successful separation of business units. Collaborate with cross-functional teams to minimize disruption and maximize deal value.

Program Manager, ABIOMED (Johnson & Johnson) | Danvers, MA

Worked collaboratively in a program management role with cross-functional team to advance technical development and FDA approval of a heart pump system with the goal of a 510k submission. Involved mentoring junior project managers and implementing program governance to facilitate greater communication and transparency.

Technical Program Manager, Fidelity Investments | Boston, MA

Managed a large technical program migrating features and systems off a legacy mainframe and onto cloud infrastructure. Required significant collaboration amongst ~10 global squads and a myriad of product teams.

CRICO (Risk Management of Harvard Medical), Project & Program Management, Boston, MA

2012 – 2017

Project manager and solutions architect to elicit requirements and evaluate SaaS solutions for a grant management system. Working with PI's (principal investigators) and the NIH, a workflow mapping exercise was completed to ensure all work streams and tasks were captured and documented to satisfy federal grant reporting requirements. Other projects included implementation/upgrade of: ServiceNow, Sitecore CMS, Jira/Confluence, Adverse Event Reporting system, SharePoint, O365, Grants Management (SaaS), Identity Management / SSO, Clinical Coding, Continuing Medical Education (CME)

Mass General Brigham (MGB), Senior Systems Engineer / Designer, Boston, MA

2001 – 2011

Senior member of project team responsible for an enterprise-wide ERP PeopleSoft system implementation including all complementary applications, interfaces, upgrades, testing, monitoring, and production support. Full SDLC. Performance Engineer owning application performance management and monitoring of Siemens' Soarian Health Information Management (HIM) suite, complementary systems, and utilities.

PeopleSoft, Inc., Consultant, Pleasanton, CA

2000 – 2001

Financials and EDI consultant for client-facing ERP implementation projects. Clients: Verizon | The Hartford | Siemens Health

E D U C A T I O N

B.A., English | Political Science, SALEM STATE UNIVERSITY | SALEM, MA

College Prep | St. John's Preparatory School | Danvers, MA
